in the future**

What is Measurement for Recovery

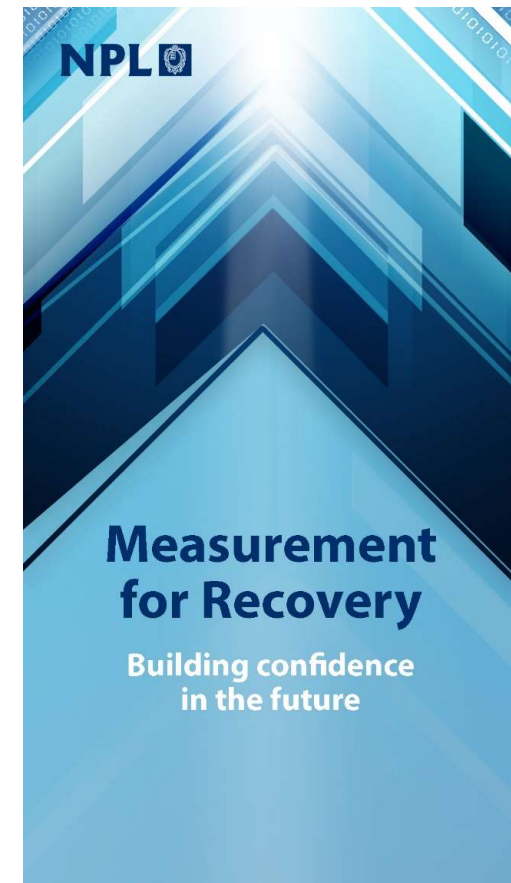

M4R brings together the UK's top measurement science experts and specialist facilities to address problems in innovative ways and help UK industry in its recovery from the COVID-19 lockdown.

*Building confidence
in the future*

Measurement for Recovery

- Supporting UK industry post COVID-19

- Allows companies to apply for access to NPL and UK Measurement Laboratory partner's measurement science experts and specialist facilities free of charge
- Help to solve analysis or measurement issues that cannot be resolved using standard technologies and techniques
- An initiative to drive investment confidence, delivering the vital data and insight that helps guide decision making
- Up to 20 days measurements focused specialist advice and project support

How M4R can help

- Provide measurement and analysis expertise
- Investigate the feasibility of concepts
- Support new products and services which directly assist the national response to COVID-19
- Help cost reduction or improve productivity
- Increase product reliability and mitigate in-service costs
- Offer advice on standards and regulatory needs

Example challenges M4R can help address

- Sharing experience to help comply with social distancing requirements
- Supporting the restart of production lines and instrumentation
- Compliance to Quality Management Systems and alternative supplier requirements
- New product development and verification
- Supply chain evaluation

M4R - How does it work

- Applications can be submitted through the M4R portal on the NPL website
- Initial applications assessed and the UK National Measurement Laboratory experts contact applicant
- Organisation's who meet criteria will be contacted by the programme team experts to discuss potential for project to move forward
- Project work programme, timescales and deliverables agreed
- The programme is currently planned to run until end 2020

Measurement for Recovery

Building confidence in the future

An NPL-led programme to help boost competitiveness and resilience

NPL and its partner National Measurement Laboratories – LGC, NIBSC, TUV-NEL and NGML – are committed to supporting the UK Government's plans for economic recovery by providing specialist measurement advice and short-term projects to companies at no charge.
